Aabhushan Dhakal

Full Stack Developer (MERN) | DSA Problem Solver | Building
Scalable Web Apps
Kathmandu, Bāgmatī, Nepal

Summary

I am an aspiring backend developer with a strong interest in building the server-side logic that powers modern applications. I enjoy working with APIs, databases, and system architecture to create efficient and scalable solutions. I am continuously learning backend technologies, improving my problem-solving skills, and building projects to gain practical experience in software development. I loved Content Creation too 740+ Youtube Subscribers.

Experience

Leapfrog Connect

Full-Stack Development Intern (Tech Lead) – Leapfrog Connect
November 2025 - February 2026 (4 months)
Kathmandu dilli bazaar

Led a small team of interns while working on development tasks using Next.js and React.js. Developed the frontend of the Draper Startup House Nepal platform, focusing on clean, modular, and scalable code. Also built the backend for Ashrya – an Old Age Care Taking platform, implementing structured APIs and following best practices for maintainable application architecture.
